

9LivesData

is a software company providing research and development services to international clients. High quality of our software is indispensable, as our products are often used in mission-critical systems. We specialize in

- Storage systems
- Big data
- Clouds
- Parallel and distributed systems
- Networking and operating systems
- Scalable, failure-tolerant, highly-available and self-healing systems
- Tools supporting large-scale, enterprise software development

We have a flat organization structure and we highly value pro-active team players. Our development process is agile-based with elements of Scrum and Kanban and a very prominent role of automation. We regularly publish in the best international conferences like USENIX FAST and attend trainings and conferences all over the world.

Front-End Engineer

Currently for our office in Warsaw/Mokotów we have an opening for an experienced Front-end Developer. You will join frontend team working for a large cloud-based business system for one of our Silicon Valley clients.

- Seniority in web technologies: JavaScript, HTML, CSS
- Very good knowledge of AngularJS ecosystem
- Experience with
 - common CSS Preprocessors, preferred: SASS
 - common building tools, preferred: Webpack, npm
 - unit testing, preferred: Jasmine, Karma

- Also a plus to have exposure to e2e testing, preferred: Protractor, Cucumber, Gherkin and CI Tools, preferred Jenkins
- Comfortable with agile development practices and jira / git
- Pro-activeness and creativity
- Good English skills

We offer:

- Stable cooperation opportunity: average consultants cooperation duration is 46 months
- Unique experience on challenging multinational world-class R&D projects
- Opportunity to contribute your ideas to an advanced product already sold widely in the world
- Interaction with smart, knowledgeable and friendly peers
- Opportunity to publish in prestigious international journals and conferences
- Personal development through trainings and conference attendance
- Excellent compensation and flexible working arrangements
- No unpaid overtime - Compensation for every hour worked.
- Very good work-life balance
- Multiple benefits and supported in-office recreational activities
